Reviewer’s report

Title: Sub-hypnotic dose of propofol as antiemetic prophylaxis attenuates intrathecal morphine-induced postoperative nausea and vomiting, and pruritus in parturient undergoing cesarean section — a randomized control trial.

Version: 1 Date: 12 May 2019

Reviewer: Rajagopalan Venkatraman

Reviewer's report:

1. The method of sample size estimation should be described.

2. P values are missing in most of the tables. It should be included to include statistical significance.

3. Though propofol and metoclopramide was compared for pruritus control, p value is not there for justification.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
