Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite

In this study, authors aimed to investigate the effect of ephedrine or phenylephrine infusion administered immediately after spinal anesthesia on hemodynamics in elderly orthopedic patients. They reported that an immediate infusion of phenylephrine or ephedrine may be used for the stability of hemodynamic changes after spinal anesthesia in elderly orthopedic patients.

This paper is well written. It may be accepted for publication without comment.

Sincerely yours…

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
