Title: Effects of Different Doses of Magnesium Sulfate on Pneumoperitoneum-related Hemodynamic Changes in Patients Undergoing Gastrointestinal Laparoscopy: a randomized, double-blind, controlled trial

Version: 1 Date: 04 Sep 2019

Reviewer: Paolo Balsorano

Reviewer's report:

I thank the authors as they provided acceptable corrections to the raised points.
- Table 2,3,4,5,6,7: the authors provided 95% CI of different data making the tables a bit heavy. I'm sorry for the misunderstanding, but when I asked for the 95% CI, I only meant to add the 95%CI of the p-value. P-value by itself gives only a limited information about the statistical significance when comparing variables. In this sense, expressing p values together with its own 95%CI gives an additional piece of information.
