Reviewer’s report

Title: Use of sugammadex in patients with neuromuscular disorders: a systematic review of case reports

Version: 1 Date: 18 Oct 2019

Reviewer: Andrej Sribar

Reviewer's report:

Thank you for this review... Neuromuscular disorders are often overlooked in the clinical setting, and postoperative respiratory failure is often caused by neuromuscular disorders. Sugammadex has saved many patients from delayed extubation or reintubation since it was introduced into clinical practice.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
