Reviewer’s report

Title: Point-of-Care Versus Central Testing of Hemoglobin During Large Volume Blood Transfusion

Version: 1 Date: 15 Sep 2019

Reviewer: Taner Abdullah

Reviewer's report:

Thank you for your answers. I still believe that it is highly controversial to compare samples from different time points in such an unstable condition regarding hemoglobin values. Nevertheless, for such a retrospective study, I also believe that the methodology and statistical approach used is remarkable and also the paper is very well written. Thank you for your cooperation and valuable work.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
