Reviewer’s report

Title: Sciatic obturator femoral technique versus spinal anaesthesia in patients undergoing surgery for fixation of open tibial fractures using Ilizarov external fixator. A randomised trial

Version: 3 Date: 04 Dec 2019

Reviewer: Dita Aditianingsih

Reviewer's report:

Thank you for addressing the issues and made revisions accordingly. However, some texts in Figure 4 (Study flow chart) are still displaced (the "Excluded" box), and the English style have not been revised ("anesthesia"), please revise cautiously

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
