Reviewer's report:

Hi dear author

I studied you manuscript and in my opinion I write some comment for you at below:

Background: an author must be more description about treatment method of procedure DB and RFT.

Methods: what is your study? if the research is clinical trial you must write document number, what is time of study? inclusion and exclusion criteria is absent, a author have to more description method of work and which monitoring used for patient?

Result: the author wrote about sample size and sex and age of study in methods that don't want repeat it in result.

discussion: the author wrote some subject matter on discussion that is not necessary so it's better deleted.

references: some references are old 1,11 so it's better to deleted

Best regard
