Reviewer’s report

Title: Retrospective Evaluation of Pain in Patients With Coccydynia Who Underwent Impar Ganglion Block

Version: 0 Date: 03 Apr 2020

Reviewer: Poupak Rahimzadeh

Reviewer's report:

Dear EIC

I read the interesting article and thanks for inviting me in this review process. Here are some points regarding the manuscript.

1-Why did not use RFT in all cases? How much time was the distance between DB and RFT?

2-What was the used drug after Impar block? Did you prescribe any pain killers?

3-Pain score in F/u was around 5, in DB group and it was around 3 in DB+RFT group. How much was the pain relief percentage? Because the pain score did not decrease so much.

4-What was your plan for unresponsive patients with no pain decline?

5-Please provide pictures of Impar block.

6-What was the type of RF generator?

Best

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
