Reviewer’s report

Title: Abnormal Cisatracurium Pharmacodynamics and Pharmacokinetics among Patients with Severe Aortic Regurgitation during Anesthetic Induction

Version: 1 Date: 05 Dec 2019

Reviewer: Andrej Sribar

Reviewer's report:

Well designed study and well written article. I would just like to point out some changes that need to be made. Since aortic regurgitation can also be found in certain other diseases which may come with abnormal pharmacokinetics in patients, I think you should expand the discussion with the benefits of Hoffman degradation compared to other routes of drug metabolism in these patients.

Thank you

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
