Reviewer’s report

Title: The Effect of Preoperative Anxiety Level on Mean Platelet Volume and Propofol Consumption

Version: 0 Date: 21 Aug 2019

Reviewer: Dilek Gunay Canpolat

Reviewer's report:

Dear Authors,

1. In the result section, what is the significantly difference between the preoperative MPV and demographic data? This must be explained clearly. 'Table 1' expression should be written in parentheses. Also, age and sex may effect the anxiety score and MPV. So this difference may effect the result of the study by disrupting standardization. How can the authors explain this?

2. Why there was a correlation between found a correlation between the MPV and anxiety scores in the anxious group and no correlation in non-anxious group? . This should be explained clearly

3. I think, it is a normal result that higher propofol consumption in patients with higher anxiety scores. What is the interest with MPV?

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
