Reviewer’s report

Title: Isolated double-orifice mitral valve: a case report

Version: 0 Date: 09 Sep 2015

Reviewer: Tain-Yen Hsia

Reviewer's report:

Krisai et al presented a single case report of an incidental discovery of an isolated double orifice mitral valve.

The case report was written succinctly with good quality images and figures. While the report is not particularly innovative, it may be of interest to readers to understand the anatomy and echo findings of a double orifice mitral valve.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
