Reviewer’s report

Title: Isolated double-orifice mitral valve: a case report

Version: 0 Date: 04 Oct 2015

Reviewer: George Makavos

Reviewer's report:

Interesting case presentation of such a rare cardiac anomaly. Images and videos including transthoracic three dimensional echocardiography, are of adequate quality and provide sufficient information.

In my opinion, three dimensional transoesophageal views could be even more educational, however, the authors' statement that there was lack of clinical indication in order to perform any additional diagnostic tests, is acceptable.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
