Reviewer’s report

Title: The cost-utility of point-of-care troponin testing to diagnose acute coronary syndrome in primary care

Version: 0 Date: 08 Jun 2017

Reviewer: Rita Pavasini

Reviewer’s report:

This is a very accurate and well conducted study on cost-effectiveness of POC troponin test use in primary care. I have only minor comments:

- It is not clear how Authors valued the QALY, did they use a particular scale or value, how the observation done to calculate QALY, were converted in numbers? (this is not well described in the dedicated paragraph).

- Another study tested the effect of POC troponin in primary health care (Please quote PMID: 25434410).

- Do the Authors think that also the use of POC assay of different brands could have changed the results of this study?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
