Title: Resting heart rate and impaired glucose regulation in Chinese middle-aged and elderly people: a cross-sectional analysis

Version: 1 Date: 30 Jun 2017

Reviewer: Stefan Söderberg

Reviewer's report:

The manuscript "Resting Heart …" by Yang and colleagues has improved and the authors have been sensitive to our comments. However, I still have some points to be addressed.

1. Still some passages indicating causality, like line 27 and line 42, both on page saying, "significant contributor". This is not correct.

2. Line 56, page 11, "first study", which obviously is not true. Please rephrase.

3. I strongly suggest that the authors should consult a professional language bureau for appropriate language revision, there are still too many grammar mistakes.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
