Reviewer's report

Title: Electrical storm during induced hypothermia in a patient with early repolarization

Version: 1 Date: 26 Oct 2017

Reviewer: Hector Barajas

Reviewer's report:

I am agreed with the response of the reviewers.

You may need to add a schematic figure to explain the simple mechanistic effect of electrical storm during the acute cooling in the patient with ERS.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
