Reviewer’s report

Title: Heart rate variability after radiofrequency ablation of epicardial ganglionated plexuses on the ovine left atrium

Version: 1 Date: 06 Sep 2017

Reviewer: Agnieszka Noszczyk - Nowak

Reviewer's report:

Still figures are unreadable. Number of animals and standard deviation are missing.

Please add the results of pre-study experiments about effectiveness of ablation (material and methods section)

The conclusion is a repeat of the results.

In my opinion, the results must be supplemented with the results histopathological examination.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
Quality of written English
