Reviewer’s report

Title: Should heart age calculators be used alongside absolute cardiovascular disease risk assessment?

Version: 0 Date: 12 Dec 2017

Reviewer: Jacek Bil

Reviewer’s report:

This is a thought-out article describing the meaning and the accessibility of the heart age calculators as the point for further discussion.

However, at the end of the paper is should be clearly stated that European(ESC)/American guidelines recommend to use risk scores rather than heart age calculators when making up clinical decisions.

And the second, the quality of figures must be improved.

Are the methods appropriate and well described? If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls? If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown? If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
