Reviewer’s report

Title: Should heart age calculators be used alongside absolute cardiovascular disease risk assessment?

Version: 0 Date: 12 Dec 2017

Reviewer: Hazwani Ahmad Yusof

Reviewer's report:

The article was well-written, and provided with a comprehensive discussion. There are, however, there is no enough explanation on the second aims of this paper (to summarise research on the effect of communicating heart age). Thus, I suggest it might be better to be included in the article though the paper is highly recommended to be published without revision.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
