Reviewer’s report

Title: Comparison of drug-eluting balloon versus drug-eluting stent for treatment of coronary artery disease: A meta-analysis of randomized controlled trials

Version: 0 Date: 04 Sep 2017

Reviewer: Matteo Serenelli

Reviewer's report:

This is an interesting meta-analysis, simple work and well done. The methods are well conceived and presented. The overall paper is well written. I would just ask to correct one little point. In the paragraph "introduction" you said that "Studies suggested that DEB improved coronary blood supply and vascular function when used for treatment of severe CAD", you should add one or more references.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
