Reviewer’s report

Title: A methodology review on the incremental prognostic value of computed tomography biomarkers in addition to Framingham Risk Score in predicting cardiovascular disease: the use of association, discrimination and reclassification

Version: 0 Date: 10 Dec 2017

Reviewer: Lizhang Chen

Reviewer's report:

This is an interesting study. Model construction are so many, but the application of model are few. The evaluation of methodology is necessary.

I have one question. Please added the quality of included studies.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
