Reviewer’s report

Title: Phosphorylated Proteomics Analysis of Human Coronary Artery Endothelial Cells Stimulated by Kawasaki Disease Patients Serum

Version: 1 Date: 26 Oct 2018

Reviewer: Li Zhang

Reviewer's report:

There were few studies on phosphorylated proteins in Kawasaki disease (KD). This paper gave us a new sight in the research of KD and had underlying value for the mechanisms of this disease. However, there were some details to be indicated.

(1) It was written that "Serum samples from children with KD were randomly selected according to the American Heart Association and the Japanese Ministry of Health and Welfare criteria", which should be chosen one of the two criteria mentioned above and attached the detailed edition.

(2) There are some spelling mistakes such as page 4 line 28 "in flied of KD", which should be corrected.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
