Title: Bisoprolol Transdermal Patch for Perioperative Care of Non-cardiac Surgery in Patients with Hypertrophic Obstructive Cardiomyopathy

Version: 2 Date: 01 Jul 2019

Reviewer: George Makavos

Reviewer's report:

"Bisoprolol Transdermal Patch for Perioperative Care of Non-cardiac Surgery in Patients with Hypertrophic Obstructive Cardiomyopathy".

Interesting and innovative study regarding transdermal administration of bisoprolol during Non-cardiac surgery.

Results in terms of hemodynamic and echocardiographic parameters and safety before switch from oral to transdermal or de novo administration of transdermal bisoprolol are adequately addressed.

I suggest that the authors will proceed with a prospective study and with an extended number of patients included, to assess transdermal bisoprolol in HOCM in the future.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
