Reviewer’s report

Title: Woven-like Change following Intracoronary Thrombosis Recanalization: A Case Report

Version: 1 Date: 24 Sep 2019

Reviewer: Agathi Vrettou

Reviewer's report:

Dear Dr. Zhang,

the case-report you have submitted represents a rare and interesting intracoronary abnormality with associated clinical interest.

Nevertheless, I would like to make the following recommendations.

At the discussion section of the case report, I think that you should add comparison between IVUS and OCT for diagnosing the described pathology (strengths and limitations of each technique, preferred method)

English language needs revision.

some minor comments are the following: page 2, line 26 CAG abbreviation should not be used
page 4, line 24-25 should be omitted -though effort is highly appreciated, it does not add something in particular at this case.

Kind regards,

Agathi-Rosa Vrettou, MD
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
