Reviewer’s report

Title: Glycated hemoglobin predicts coronary artery disease in non-diabetic adults

Version: 0  Date: 22 Mar 2019

Reviewer: Surbhi Chamaria

Reviewer's report:

Glycated hemoglobin is an important assay to assess diabetic status and Diabetes is an important predictor of CAD.

Major comments

1. As the authors pointed out this is a very small sample size and it cannot be extrapolated to the real world.

2. What was the follow up? Did the patients with positive CCTA have an angiogram for definite diagnosis?

3. Were any of these patients of statins?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
Please indicate the quality of language in the manuscript:
