Reviewer’s report

Title: Layer-specific speckle tracking analysis of left ventricular systolic function and synchrony in maintenance hemodialysis patients

Version: 1 Date: 10 Dec 2019

Reviewer: Alexandros Briasoulis

Reviewer's report:

The authors have provided appropriate responses to the comments raised by other reviewers. I don't have anything else to add. There are limitations related to the small sample size and the strain measurements according to myocardial layers. These measurements have not been validated and they have limited application in clinical practice currently. However, there is potential and the hypothesis is interesting.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
