Reviewer’s report

Version: 0 Date: 25 Jul 2018

Reviewer: Jolanda Kluin

Reviewer's report:

This is an interesting analysis on the impact of timing in Fallot patients. The study is executed very well and clearly written. I only have some small comments:

- Background, line 5: conoventricular instead of conoventricular

- Background, line 10: lots instead of lost

- Conclusion. I would recommend to change the sentence on morbidities (In those undergoing elective repair...) in the sentence used in the abstract (In the subgroup that underwent elective repair...)

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
Please indicate the quality of language in the manuscript:
