Reviewer's report

Title: Trends in electrocardiographic abnormalities and risk of cardiovascular mortality in Lithuania, 1986-2015

Version: 1 Date: 17 Dec 2018

Reviewer: Reviewer 2

Reviewer's report:

REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER:

Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution? Yes

Reviewer comments: The authors have provided a detailed description of the inclusion and exclusion criteria of the study as suggested. Also, the authors have provided an adequate description of the coders who interpreted the ECG including how discrepancies were resolved as requested. The authors have also provided a brief description of the implication of poor response rate in the study limitations including the direction of the effect.

I have read the revised manuscript and overall, the authors have satisfactorily responded to all the issues raised during my previous review. I believe the manuscript is now in a better shape for publication and I have no objection to its further consideration.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
