Reviewer’s report

Title: Extreme ST-segment elevations in seemingly no significant angiographic coronary artery abnormalities: a case report

Version: 1 Date: 26 Nov 2018

Reviewer: Weichieh Lee

Reviewer's report:

It is a good work about MINOCA.

However, the author need to consider other diagnosis including severe myocarditis due to rapid deterioration. How did the author exclude other diagnosis? This relatively young man without medical history need considering myocarditis.

Could the author provide the biopsy of myocardium?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
