Title: The predictive value of the renal resistive index for contrast-induced nephropathy in patients with acute coronary syndrome

Version: 0 Date: 08 Dec 2018

Reviewer: Myriam Carpenito

Reviewer's report:

Dear author, the idea is very interesting, but as a preliminary draft, I would recommend making some changes:

First of all, I recommend making changes to the text in order to use more scientific English;

I suggest widening the conclusions of the article;

I would suggest you to explain in detail which are the risk factors associated with the patient' CIN, and also to illustrate in detail the new renal damage biomarkers;

I think it is also important to correlate the results with the dose of contrast administered

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
