Reviewer’s report

Title: Modified balloon-stent kissing technique avoid side-branch compromise for simple true bifurcation lesions

Version: 0 Date: 11 Sep 2018

Reviewer: Toshiya Muramatsu

Reviewer's report:

This paper shows that efficacy of BSKT for bifurcation lesions. However, it is necessary to revise as below.

1. Table and figure is so poor and few. It is necessary to describe how to do BSKT and PS. And more details of data should be necessary.

2. Clinical impact is not strong. Benefit of BSKT is not significant. Suggest more appropriate indication.

3. What is negative side of BSKT. For example, complication, costly, technical issue etc.

4. Anyway, what types of bifurcation lesion is necessary to protect side branch? Most of side branch is not need protect wire.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
Please indicate the quality of language in the manuscript:

Needs some language corrections before being published

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
