Title: Characteristics of patients initiated on edoxaban in Europe: baseline data from Edoxaban Treatment in routine clinical practice for patients with atrial fibrillation (AF) in Europe (ETNA-AF-Europe)

Version: 0 Date: 27 May 2019

Reviewer: İhsan Alur

Reviewer's report:

Dear writers,

Manuscript Number BCAR-D-19-00203 entitled "Characteristics of patients initiated on edoxaban in Europe: baseline data from Edoxaban Treatment in routine clinical practice for patients with atrial fibrillation (AF) in Europe (ETNA-AF-Europe)" has been reviewed.

First of all I want to thank the writers of this article for their planning and performed such an important 'Descriptive' study. I have read this study and here are my ideas and thoughts about it:

The methodology of the study is well-designed. The results are consistent with the literature.

I think this paper can be accepted.

Best regards.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
