Reviewer’s report

Title: Clinical Outcomes of Coronary Artery Bifurcation Disease Patients Underwent Culotte Two-stent Technique: A Single Center Experience

Version: 1 Date: 18 Dec 2018

Reviewer: Dobrin Vassilev

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

1. There is a big mixture of bifurcation disease dominated by left main lesions and LAD lesions. Thus, the conclusions could be addressed for those groups.

2. No definition of outcomes in methods section - it is necessary, because whole manuscript is written, because of that!

3. Table 3 is lacking - I suppose it should present predictors of TLF.

4. The in-hospital mortality is high. Why?

5. How the follow-up was performed? What were indications for rePCI - regular angiography (at what time), symptoms???

6. The outcomes in LM and non-LM groups should be separated.

7. In tables I suppose that authors meant univariate and multivariate logistics analysis, not non-adjusted and adjusted. This should be specified.

8. The whole first paragraph in discussion is useless, as it repeats results from previous section. Should be omitted. Later-on there is again repeat of results without comparison with data from studies cited from the authors. That should be corrected.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

Needs some language corrections before being published

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
