Title: Evaluation of Tp-e Interval, Tp-e/QT Ratio and Tp-e/QTc Ratio in Patients with Acute Myocarditis

Version: 1 Date: 12 Apr 2019

Reviewer: Francesco Santoro

Reviewer's report:

Dear Editor

Thanks for the opportunity to review the paper entitled "Evaluation of Tp-e Interval, Tp-e/QT Ratio and Tp-e/QTc Ratio in Patients with Acute Myocarditis".

The authors partially replied to my concerns.

Arrhythmic complication during hospitalization needs to be pointed out. Author replied there were 4 patients with non sustained VT and one patients died. This needs to be reported both in the abstract and in the results section. These complications shows show myocarditis can be in a subset of patients a dangerous pathology.

Authors should add a table showing ECG features (QT interval, QRS duration, Tp Te) in patients with or without arrhythmia during hospitalization. Although there are no differences these data may be useful for next studies.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
Please indicate the quality of language in the manuscript:
