Reviewer’s report

Title: Value of dual Doppler echocardiography for prediction of atrial fibrillation recurrence after radiofrequency catheter ablation

Version: 1 Date: 31 Jul 2019

Reviewer: Stefan Simovic

Reviewer's report:
The manuscript is written well and represents a novel finding of use of dual Doppler echocardiography in RF ablation patients. However, there is one concern regarding patients with previous acute coronary syndrome and ischaemic heart disease in the experimental group, were there any included? Authors mention including coronary heart disease patients in the control group.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
