Reviewer’s report

Title: Heart Rate n-Variability (HRnV) and Its Application to Risk Stratification of Chest Pain Patients in the Emergency Department

Version: 1 Date: 09 Mar 2020

Reviewer: Han-Kuei Wu

Reviewer's report:

The manuscript was well revised. However there was still one suggestion: 1. In Table 5, there were two variable(HR2V skewness & HR2V SampEn) including 1 in confidence interval, which may not be suitable as the predictors. And the logistic regression analysis should be renewed.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
