Reviewer’s report

Title: Prospective study of recovery from copperhead snake envenomation

Version: 2 Date: 15 October 2014

Reviewer: Farshad SHIRAZI

Reviewer’s report:

Minor Essential Revisions:
How well did the objective measures such as grip strength and ability to walk performed in assessment of recovery compared to the best subjective assessment tools in this study?

Discretionary Revisions:
why not compare your out comes to more established outcomes of recovery from fracture of lower or upper extremities or recovery of burns of extremities.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
