Reviewer’s report

Title: Metabolic networks in a porcine model of trauma and hemorrhagic shock demonstrate different control mechanism with carbohydrate pre-feed

Version: 3  Date: 8 December 2014

Reviewer: Huang-Ping Yu

Reviewer’s report:

Overall, the study is designed well. Minor comments are as follows.

1. How to choose the number of experimental animals in each group? Please provide the reason.
2. Please describe the animal model of hemorrhagic shock in details, such as the shock period. Is anticoagulat used for shed blood?
3. A sample figure of orginal metabolic data in each group is suggested to be provided.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
