Reviewer’s report

Title: The effectiveness of physiologically based early warning or track and trigger systems after triage in adult patients presenting to emergency departments: A systematic review

Version: 1 Date: 27 Sep 2017

Reviewer: Karen New

Reviewer's report:
Thank you for addressing all comments. The changes have enhanced the paper. Just a minor comment that you may wish to consider - the change you have made to the first sentence in the conclusion, has impacted on the sentence structure (tense) "There is a lack of high quality RCTs to test the effects of using early warning systems in the ED on patient outcomes".

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
Not relevant to this manuscript
