Reviewer’s report

Title: Ambulance use is not associated with patient acuity after road traffic collisions: a cross-sectional study from Addis Ababa, Ethiopia

Version: 0 Date: 14 Dec 2017

Reviewer: Miklosh Bala

Reviewer's report:

The article is important in promotion of injury prevention from RTA and highlighted the importance of prehospital trauma system. The article focused mostly on demographic data and not specific injuries. This is probably due to insufficient trauma registry and communication.

The authors very well described the current situation in Addis Ababa and proposed steps to improvement. It is probably important to other African countries.

I would ask the Editor to accept this paper without further revision.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
