Reviewer’s report

Title: Enhanced prehospital volume therapy does not lead to improved outcomes in severely injured patients with severe traumatic brain injury

Version: 1 Date: 24 Sep 2018

Reviewer: Reviewer 2

Reviewer's report:

PEER REVIEWER COMMENTS: To view the full report from the academic peer reviewer, please see the attached file.

REVIEWSER COMMENTS FROM REPORT: The study message is very useful. Study population is large. The authors demonstrated that the aggressive fluid administration to patients with TBI did not change the outcome

REQUESTED REVISIONS:
The statistics authors used are very basic and need logistical regression analysis to interpret the results with more precision

ADDITIONAL REQUESTS/SUGGESTIONS:
The references authors used are very old (more than 10 years). They need to use current evidence

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

Quality of written English
