Reviewer's report:

I have read the manuscript entitled "Acute recreational drug toxicity in women: a case series from Oslo, Norway". The manuscript presents a potentially interesting topic for the readers; However, it may be better if you pay attention to the following suggestions:

This is a research article. Why is the title of the article "a case series"?

Some of the data in the background can be taken to the discussion section.(US, Australian study, Spanish study, Swiss, Norwegian)

In the discussion section, please shorten the "Strengths and limitations" too long.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
