Reviewer’s report

Title: Grading and Assessment of Clinical Predictive Tools for Paediatric Head Injury: A New Evidence-Based Approach

Version: 0 Date: 21 Apr 2019

Reviewer: Martin Rohacek

Reviewer's report:

Khalifa et al performed a study that aims to grade and assess pediatric head injury predictive tools. This is a well written and interesting manuscript. Its message is clinically relevant.

I have only minor comments:

Abstract: The conclusion does not clearly refer to the research question.

Background: Is well written, and objectives are clearly stated.

Methods: are clearly described.

Results: The results are clearly outlined

Discussion: Limitation section is missing

Conclusion: The conclusion does not clearly refer to the objectives and results.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
