Title: The Emergency Medical System (EMS) response to Iraqi pilgrims’ bus crash in Iran: A case report

Version: 1 Date: 08 Apr 2019

Reviewer: Adewale Ogunnaike

Reviewer’s report:

The translation should still be reviewed by a native English speaker because some of the information are lost to translation (I suppose). The Table 2 for injury types of victims should be reclassified to a more robust classification so that the frequency & percentages can communicate reasonable information. Suggested classification can be Head injury, limbs injury, trunk injury, spinal cord injury.

Thank you.
