Reviewer’s report

Title: Sensitivity of urinary pathogens for patients discharged from the emergency department compared with the hospital antibiogram

Version: 0 Date: 29 Jun 2019

Reviewer: Ardavan Khoshnood

Reviewer's report:

Dear authors,

This is indeed a good and clear study. I have only some few comments:

1. I would recommend that you use the STROBE statement since this is an observational study.

2. You write that K. Pneumoniae accounted for over 10%. It would be best if you could write the exact figure.

3. Discussion, page 8, road 12-14, please delete "A retrospective chart review performed by..." since this is extra.

As stated, this paper is good. It is easy to follow and understand. Very good indeed. BUT, I do not quite understand what it contributes to what we already know on this matter. For me, there is a huge lack of originality.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes
Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
