Reviewer’s report

Title: Early inter-hospital transfer of patients with myocardial infarction without a doctor, paramedic or nurse on board: results from a French regional emergency care network

Version: 0 Date: 08 Jun 2018

Reviewer: Marc Sabbe

Reviewer's report:

First of all, an interesting paper, especially in times where locoregional networking is essential. However, I am missing a power calculation out of previous publications how many cases should be studied to be sure that there is no inferiority not using MICU for those transports. In addition, as the problem is simple and clear, the discussion can be made shorter.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
