Reviewer’s report

Title: Predictors of mortality and validation of burn mortality prognostic scores in a Malaysian burns intensive care unit

Version: 0 Date: 27 Apr 2019

Reviewer: rosanna varutti

Reviewer's report:

1) Why do you use heparin in patients with inhalational injury? It would be useful to explain it in the text.

2) By age: given the great variability, it would be better to classify patients by age intervals with relative frequency

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
