Reviewer’s report

Title: First line in psychiatric emergency: Pre-hospital emergency protocol for mental disorders in Iran

Version: 1 Date: 24 Dec 2019

Reviewer's report:

I would like to thank the authors for their efforts to address the previous comments. I still think this is an important topic, however, this work still needs a few minor changes including:

1- It is important to the readers to know about the numbers of screened, included and excluded studies. Although the authors mention that these info are available in page 5, I could not locate them throughout the manuscript
2- table 1: I would recommend adding the sample size (participants or papers) of each study, where applicable!
3- I am not convinced about the quality assessment of the included paper, however, given this is not a systematic review, the experts opinion would suffice.
4- I would highly suggest the authors to seek English proofreading, especially for the newly added texts.
5- Also, different fonts are noticed throughout the manuscript, especially the newly added text.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
