Reviewer’s report

Title: Outcomes following administration of tranexamic acid in combat-related intracranial hemorrhage: a cohort study

Version: 0 Date: 15 Feb 2020

Reviewer: Hideharu Tanaka,

Reviewer's report:

In your study, why do you think about increase in GCS improvement with TXA? Please identify more detailed explain pathophysiology. Why TXA administration in patients with combat-related intracranial hemorrhage shows no difference in progression of intracranial hemorrhage, need for cranial decompression, Glasgow Outcome Score, or mortality? Please answer to brief mechanism.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
