Reviewer's report

Title: Prostate cancer: net survival and cause-specific survival rates after multiple imputation.

Version: 1 Date: 29 April 2015

Reviewer: Bo Hu

Reviewer's report:

Minor Essential Revisions
1. The number of imputed datasets for pooled analysis is not consistent throughout the paper. For example, the abstract says 10 imputed datasets but lines 154 and 222 say 20.
2. Some figures such as figure 1 are more appropriate to be included in the appendix or as supplementary materials.

Discretionary Revisions
1. Ln 209. Please specify the relative efficiencies are for which variables.
2. Table 6. The bracket for the age category of 70+ has a typo.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
