Title: Leveraging the EHR4CR Platform to Support Patient Inclusion in Academic Studies: Challenges and Lessons Learned

Version: 0 Date: 13 Oct 2016

Reviewer: Ann Christina Foldenauer

Reviewer's report:

The authors presented a sound scientific manuscript in the scope of the journal dealing with the concept and problems on how patient data of EHRs can be normalized for the use of patient recruitment. The concepts and problems presented can also be considered for data coding in statistical analysis and therefore represent an interesting contribution to the field of medical research. I recommend accepting the manuscript with few adjustments required.
